Eva

We have had some difficulties when converting the excel file to a graph regarding the dates and thought we had it fixed but apparently not. We can send the excel files and the complete history of W-37.

Thanks

Don –

I appreciate your willingness to provide additional information when we have questions about some part of the SEE process or other aspects of the ST-12 site. To make the information you provided yesterday more understandable, and to put it in perspective, it would be helpful if you could:

- Correct the dates on the graph for W37 before bailing/pumping (I don't believe you were out there measuring depths in 1900)
- Put these before and after graphs for W37 on the same scales so that they can be more easily compared (it might be helpful if you sent them as an Excel file so I can play with the scales as I want to)
- Please provide the table with the complete history of the amount of LNAPL removed from W37, so we can see how much was accumulating there prior to the start of SEE

Thanks - Eva
